ABOUT ME

I'm Bhavin Varsur, an IT Analyst at Tata Consultancy Services, passionate about crafting efficient, scalable, and user-friendly software. With expertise in .NET, C#, JavaScript, HTML/CSS, SQL Server, and MongoDB, I focus on clean code, agile delivery, and seamless user experiences. I enjoy transforming complex business needs into elegant technical solutions and continuously strive to grow through innovation and collaboration.

EXPERIENCE

IT Analyst

Tata Consultancy Services (TCS)

March 2022 – Present

- Analyse and resolve customer-reported issues with precision and speed.
- Deliver clean, structured, and maintainable code tailored to evolving business needs.
- Collaborate with QA and support teams to ensure quick bug resolutions and seamless deployments.
- Follow coding best practices and maintain high standards in code quality and documentation.
- Participate in Agile ceremonies including stand-ups, sprint planning, and retrospectives.

Back End Developer

Shree Swaminarayan Gurukul Organization

April 2019 – February 2022

- Developed RESTful APIs using .NET for systems deployed across Gurukul branches.
- Applied Test Driven Development (TDD) with xUnit for high-quality unit and integration tests.
- Managed database operations to ensure reliable backend performance.
- Delivered key features for applications supporting admissions, student records, and finance.
- Demonstrated product releases to stakeholders and supported post-deployment queries.

SKILLS & ABILITIES

- Languages & Frameworks: C#, .NET Core, ASP.NET, JavaScript, HTML5, CSS3
- Databases: SQL Server, MongoDB
- Testing: xUnit, TDD
- Tools & Concepts: Visual Studio, Git, Agile, REST APIs, Clean Code Practices
